PROFESSIONAL SUMMARY

AI/ML Enthusiast with experience building intelligent systems, automation pipelines, and data-driven applications. Strong foundation in machine learning, deep learning, data structures, and algorithms, supported by solving 250+ coding problems on LeetCode (peak rating: 1554) and Codeforces. Skilled in scalable AI solutions and solving real-world problems through AI/ML.

EDUCATION

Bachelor of Technology (Artificial intelligence)
Newton School of Technology, Rishihood University

2024 - 2028
Grade: 7.01/10.0

Intermediate (Class XII)
Pioneer Convent School

2022 - 2023
Grade: 77.8%

PROJECTS

Shadow HR — Python, LLM, Playwright, Sentence-Transformers, GitHub API ([Github](#)) ([Demo](#)) March 2026

- Built an end-to-end AI resume verification engine that parses PDF resumes, extracts technical claims via Groq LLM, and cross-validates against live GitHub repositories using semantic matching, commit analysis, and infrastructure detection.
- Architected a scalable multi-stage audit pipeline with async URL validation, parallel repo enrichment, README-to-code alignment, stack sophistication scoring, and portfolio-level credibility ranking to generate recruiter-ready audit outputs.
- Optimized repository analysis through ThreadPoolExecutor parallelism, caching, embedding batching, and Playwright validation, improving the scalability and verification accuracy while processing 60+ repo portfolios in 1.5–3.0 minutes.

CropWise AI— Python, LangGraph, FAISS, HuggingFace, Streamlit ([Github](#)) ([Demo](#)) February 2026

- Built an end-to-end AI-powered crop yield prediction and farm advisory system that analyzes soil, climate, and farming inputs to generate the yield predictions and recommendations using Machine Learning, RAG, and LLM orchestration.
- Developed a LangGraph-based agentic pipeline integrating Linear Regression, rule-based issue detection, FAISS semantic retrieval, and HuggingFace LLMs to deliver explainable and risk-aware agricultural insights with conditional execution.
- Developed a scalable modular architecture integrating advisory generation, Streamlit UI, and Sentence-Transformers embeddings to support bilingual farmer interaction and optimize the real-time inference performance efficiently at scale.

CERTIFICATIONS

Young Turks 2025 Naukri Campus ([Link](#))

September 2025

- Scored 99.93 percentile in Naukri Campus Young Turks 2025, ranking in the top 0.07% nationwide, demonstrating excellence in quantitative aptitude, logical reasoning, problem-solving, and time-bound competitive assessments.

SKILLS

Computer Languages: Machine Learning, Python, TypeScript, HTML, CSS

Data Tools: TensorFlow, NumPy

Software Packages: Pandas, Matplotlib, Figma, MySQL, Excel, Express JS, Django, MongoDB

Others: Git and Github, LLM, Generative AI, LangChain, API testing, GenAI, LangGraph, Playwright, Hugging Face

EXTRA-CURRICULAR ACTIVITIES

- Participated in ICPC 2025, demonstrating strong algorithmic analysis thinking and competitive programming skills..
- Participated in multiple hackathons, including HackaPirate and SIH, developing strong technical problem-solving skills.
